COLLOIDS AND SURFACES A

# Subject Index

Acid–base properties, 167
Adsorbates, 35
Adsorbed alkoxides, 27
Adsorption, 19, 133, 151, 199, 309
Adsorption equilibria, 257
Alkoxysilanes, 251
Aluminium oxide, 167
Aluminum oxide, 79
Anionic surfactant micelles, 319

Benzyl alcohol, 319
Black carbon, 47

Calcium carbonate suspension, 211
Carbon monoxide, 19, 87
Cationic starch, 199
Cationic surfactant, 265, 305
Cationic surfactant micelles, 319
Cellulose fibres, 199
Ceramic materials, 251
Charge regulation, 173
Chlorine, 167
Chlorosilane reactions, 95
Clay minerals, 105
CO insertion, 35
Colloid, 221
Colloid composition, 243
Composites, 105
Conducting polymer, 105
Controlled-rate thermal analysis, 291
Core–shell latexes, 243

Derivatised silica, 95
Derjaguin approximation, 257
Differential scanning calorimetry, 291
Dihydrogen, 79
Dinitrogen, 79
DLVO theory, 221

$E_T(30)$, 233
Effect of duration, 191
Effect of temperature, 181
Environmental catalysis, 113
Ethoxides, 27

Field-flow fractionation, 243
Flocculation, 199
Fractals, 173
FT-IR analysis, 123
FT-IRAS, 27
FT-IR spectroscopy, 47

Galena surfaces, 325
Glass, 251

Hydrolysis, 305
Hydrothermal modification, 181, 191
Hydrotreating catalysts, 123
Hydroxyl groups, 1

Infrared, 19
Infrared spectroscopy, 35, 79, 87, 105, 113, 143
Interaction phenomena, 325
Ionic strength, 199
Iron(III) species, 325
IR spectroscopy, 1, 95, 133

Kinetics of adsorption, 173

Lewis–Brønsted acidity, 87
Location and surface coverage, 143
Long-chain *n*-alkanols, 309

Melts, 309
Metal, 19
Metal alkoxides, 251
Mica surfaces, 309
Micellar catalysis, 305
Micellisation, 233
Molecular structure, 143
Monolayers, 309

N-alkyl betaines, 233
Nitrogen, 87
Nitrogen dioxide, 47
*p*-Nitrophenyl esters, 305
Nitrous oxide, 113
NO reduction, 35

Oleic acid, 151
OTS, 95
Oxygen plasma, 277
Ozone, 47

Particle size distribution, 243
Phase behaviour, 265
Phase transitions, 291
Phenol, 319
Platinum, 19
Polypropylene, 277
Polypyrrole, 105
Porous media, 221
Porous silica, 173

Radiofrequency field effects, 211
Reactivity, 35

Scanning force microscopy, 309
Silica gel, 151, 291
Silica gels, 181, 191
Silica surface, 95
Silica surfaces, 309
$SiO_2$, 133
Sol–gel process, 251
Solute adsorption–force relationship, 257
Successive adsorption, 159
Sulfur dioxide, 47
Supported metal oxide catalysts, 143
Supported rhodium, 79
Surface, 167
Surface acidity, 143
Surface charge distribution, 173
Surface composition, 243
Surface force balance, 257
Surface modification, 159
Surfactants, 159

Titanium dioxide, 79, 159
Titanium dioxide suspension, 211
12-Tungstophosphoric acid, 133
Two-step reaction, 95

Wetting, 291

Zeolites, 1
Zeta potential, 211
Zinc oxide, 87
Zirconia, 113
